

# MUHAMMAD ABDULLAH AFAQ

Full-Stack Developer | MERN Stack | AI-Integrated Systems

+92 324 9534370 | [abdullahafaq17@gmail.com](mailto:abdullahafaq17@gmail.com) | Lahore, Pakistan

[GitHub](#) | [LinkedIn](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

Full-stack developer who builds complete products end to end from database schema and REST APIs through to responsive front-end interfaces and containerized production deployments. Comfortable across the MERN stack and beyond, with a track record of shipping real, working systems: a live e-commerce platform handling real orders, a real-time collaborative mobile app, and an end-to-end AI inference pipeline. I take ownership of the whole thing, not just my corner of it.

## TECHNICAL SKILLS

**Frontend:** React.js, Next.js, JavaScript / TypeScript, HTML5, CSS3, Tailwind CSS, Expo (React Native)

**Backend:** Node.js, Express.js, REST APIs, Laravel, Flask

**Databases:** MongoDB, MySQL, SQLite, Firebase, Redis, Elasticsearch

**Cloud and DevOps:** Docker, AWS (S3, EC2), Caddy, BullMQ, CI/CD workflows

**AI and LLMs:** LangChain, Groq API, LTX-Video, Hugging Face, multi-model orchestration

**Languages:** JavaScript / TypeScript, Python, PHP, C/C++

## EXPERIENCE

**Machine Learning Intern (Remote)** *FlyRank AI* Jul 2026 – Sep 2026

- Built an end-to-end ML pipeline predicting content performance decline across 30+ clients on a 341,701-item dataset, working in Python with structured notebooks and version-controlled workflows in a fully remote async team.
- Audited a 36-page internal SEO research paper for methodology gaps and contributed analysis of 469M search impressions that fed into a publicly deployed data report.

**Software Engineer (Remote)** *Digital Labs AI* Jan 2026 – Mar 2026

- Built and maintained scalable RESTful APIs and backend services under real production traffic, working across the full stack from database design through to front-end integration.
- Engineered containerized deployment workflows using Docker, maintaining stable production server environments across multiple client projects.
- Delivered e-commerce and custom portal solutions covering database design, server-side logic, and front-end integration under real project deadlines.
- Participated in code reviews, debugging sessions, and technical discussions maintaining high code quality across the team.

## PROJECTS

**Service Snap | Mern-Stack Web Application** | React.js · Node.js · MongoDB · LangChain2025

[GitHub](#)

- Designed and developed a full-stack platform connecting customers with nearby service providers, handling everything from requirement analysis and system design through to deployment.
- Built location-based matching to efficiently connect users with nearby professionals, with end-to-end features covering service listings, user interactions, and provider mapping.
- Integrated a LangChain-powered AI chatbot providing context-aware DIY guidance and troubleshooting support directly inside the product.

**Qubix | Laravel E-Commerce Platform** | Laravel · PHP · MySQL · Redis · Elasticsearch · Docker2025

[GitHub](#) | [Live](#)

- Built and deployed a full e-commerce platform on Laravel 11 and PHP 8.2 with MySQL, Redis, and Elasticsearch 7.17 powering catalog search and layered navigation — live at [jjbags.in](http://jjbags.in).

- Engineered a containerized production stack on a Hostinger VPS using Docker and Caddy with auto-HTTPS, dedicated queue-worker and scheduler containers, and a Vite-based storefront build pipeline for zero-downtime asset delivery.
- Developed end-to-end commerce features including product catalog, cart and checkout, tax and shipping rules, catalog price rules, and a custom admin panel with Elasticsearch-backed product indexing.

**HeartSync | Real-Time Collaborative Mobile App** | React Native · Firebase · Expo · Skia2025

[GitHub](#)

- Engineered a high-performance interactive drawing canvas using React Native Skia and React Native Reanimated with React Native Gesture Handler for lag-free 60 FPS rendering.
- Architected a real-time synchronization and messaging pipeline using Firebase Firestore and Firebase Storage, delivering sub-second drawing, chat, and state updates with seamless offline and online transitions.
- Built a modular mobile architecture with Expo Router and centralized services managing pairing handshakes, invitation workflows, and session states to reduce memory overhead.

**Tassawur | AI Cinematic Video Generator** | Python · Groq · Modal Labs · BullMQ · Redis2026

[GitHub](#)

- Designed and deployed a full end-to-end AI inference pipeline (Groq to Flux to Modal Labs LTX-Video) that converts a text prompt into a cinematic MP4, with a custom async orchestration layer managing multi-model coordination.
- Engineered fault-tolerant job recovery using BullMQ and Redis, distinguishing transient from permanent failures to auto-heal across 90-second GPU cold starts.
- Applied cross-scene consistency techniques including identity injection, world-context locking, and temporal continuity across all generated frames.

**EDUCATION**

**Bachelor's in Software Engineering** *University of Management and Technology, Lahore* 2021 – 2025

**Intermediate of Computer Science** *Pakistan School Muscat, Darsait* 2019 – 2021

**CERTIFICATIONS**

**Machine Learning Internship Program | FlyRank AI** Sep 2026

*FlyRank Corp. | flyrank.ai*

Credential ID: FR-D11-65B0F-E0FBC | Verify: <https://internship.flyrank.ai/verify>

**AWS AI Practitioner Challenge** Jun 2026

*Udacity*

**Developing Back-End Apps with Node.js and Express** Jul 2026

*IBM | Coursera*

**SOFT SKILLS**

Problem Solving | Attention to Detail | Collaboration | Adaptability | Communication | Time Management | Mentoring
